Unicode Charts for STIX Two Text Regular Version 2.12 b168

David M. Jones (on behalf of STIPub)

Generated March 25, 2021

These charts compare the STIX 2.10 against Unicode 13.0.0.

Legend

- Characters shown in black (e.g., U+0021) are supported directly by the font.
- Characters shown in red (e.g., U+01CE) are not directly supported but can be synthesized by a Unicode-aware shaping engine. (These charts were generated with X₇T_EX 0.999992.)
- Grey squares (e.g., U+0380) indicate code points that are not assigned a meaning in Unicode 13.0.
- Otherwise blank squares that contain a code point (e.g., U+0020) indicate characters with no visible representation. These may or may not be zero-width characters; see the Unicode Standard for details.
- Completely blank squares (e.g., U+0181) indicate code points corresponding to characters that STIX 2.10 does not support.
- Black squares (e.g., U+FFFE) indicate noncharacter code points.

Notes

- Not every composite character supported by the STIX fonts is included in these charts; only characters that are assigned a code point by Unicode 13.0 are shown. For example, you will not find "x" in these charts since Unicode does not assign a code point to that character. It can, however, be composed from the sequence U+0078 LATIN SMALL LETTER X followed by U+0323 COMBINING DOT BELOW.
- Glyphs are shown at size 20 pt unless otherwise indicated.

OpenType Language Systems and Features

See the OpenType Specification for a description of the following features.

Script	Language	c2sc	case	ccmp	dnom	frac	liga
DFLT	DEFAULT	✓	✓	✓	✓	✓	1
cyrl	DEFAULT	✓	✓	✓	✓	✓	
grek	DEFAULT	✓	✓	✓	✓	✓	
latn	DEFAULT	✓	✓	✓	✓	✓	1
	LTH	✓	✓	✓	✓	✓	1
	ROM	✓	✓	✓	✓	✓	1
	TRK	✓	✓	✓	✓	✓	✓

Script	Language	numr	onum	pnum	smcp	subs	sups
DFLT	DEFAULT	✓	✓	✓	✓	✓	1
cyrl	DEFAULT	✓	✓	✓	✓	✓	1
grek	DEFAULT	✓	✓	✓	✓	✓	✓
latn	DEFAULT	✓	✓	✓	✓	✓	✓
	LTH	✓	✓	✓	✓	✓	✓
	ROM	✓	✓	✓	✓	✓	✓
	TRK	✓	✓	✓	✓	✓	✓

The locl feature

ROM U+015E $\$ \rightarrow \$$ U+0218

U+015F $\stackrel{,}{s} \rightarrow \stackrel{,}{s}$ U+0219 U+0162 $\stackrel{,}{T} \rightarrow \stackrel{,}{T}$ U+021A

U+0163 $t \rightarrow t$ U+021B

TRK U+0069 I \rightarrow i small caps 'i'

Character Variants

Script Language cv01 cv02 cv03

DFLT	DEFAULT	✓	✓	✓
cyrl	DEFAULT			✓
grek	DEFAULT			✓
latn	DEFAULT	1	✓	✓
	LTH	1	✓	✓
	ROM	1	✓	✓
	TRK	✓	✓	✓

cv01 $\lambda \rightarrow \lambda$ U+019B LATIN SMALL LETTER LAMBDA WITH STROKE

cv02 $\sigma \rightarrow \gamma$ U+0264 LATIN SMALL LETTER RAMS HORN

cv03 \rightarrow U+2423 OPEN BOX

Substitutions

The following pages list all "interesting" glyph substitutions by feature. A listing such as

```
\begin{array}{c} U+0024 \$ \\ \text{c2sc} \rightarrow \$ \end{array}
```

means that the c2sc feature applies to all scripts and language systems. A listing such as

```
\begin{split} U+0162\, T \\ \text{c2sc.DFLT} &\to T \\ \text{c2sc.latn} &\to T \\ \text{locl.latn.ROM} &\to T \end{split}
```

means that the c2sc substitution is only active for the DFLT and latn scripts, but not for the cyrl or grek scripts, and the locl substitution is only active in the ROM language system of the latn script.
